Check valve(s)			75% of product cost	
Flow meter (requires compatible controller)			75% of product cost	

Retrofits	No. Zones Converted	Maximum Rebate Amount per Zone	Rebate
Conversion of turf zone to multi-stream or rotary nozzles		\$75	
Conversion of a zone to drip or bubblers		\$150	
Capping an entire zone		\$150	

Rebate Total (Maximum is \$800) _____

AGREEMENT

- In order to qualify for the efficient irrigation rebate, the property must be a direct City of Round Rock water customer in good standing.
- Dated and **itemized** sales receipt *must be* submitted with the program application within 60-days of installation date to qualify.
- Rebate is allowed one-time per calendar year per water account and is available on a first-come, first-served basis until September 30, 2013 or funds have been expended, whichever comes first. The program is subject to change or end, without notice. Please ensure it is available before starting your project.

I have read and agree to the terms. Signed: _____ Date: _____

EFFICIENT IRRIGATION REBATE PROGRAM GUIDELINES

Qualification:

- Program applicant must be a direct water customer of the City of Round Rock in good standing.
- Rebate is for **existing** systems only, not brand new systems or expansions of existing systems.
- Program is available to any property type.

Application Procedure:

1. A pre-inspection is not required. Proceed with retrofit or installation of new equipment.
2. When project is complete, submit application and ***itemized and dated receipts*** to addresses below.
3. Submit a separate application for each water account, if applicable.
4. You will be contacted to schedule a final inspection.
5. The rebate check will be mailed 2-4 weeks after final inspection is completed.

Explanation of Eligible Retrofits:

1. Conversion of spray or rotor zone(s) to multi-stream nozzles—conversion of existing turf zone from traditional, pop-up spray to multi-stream, rotating, or low emission nozzles, such as Toro Precision Nozzles, Rainbird RN nozzles, Hunter MP Rotators, or K Rain rotary nozzles.
2. Converting a zone to drip or bubblers—conversion of color or shrub beds, parkway strips (area between sidewalk & street), parking lot island, or street median that is currently irrigated by pop-up irrigation. Drip system must have appropriate pressure regulation, a filter, & pressure release valve. Or capping all overhead irrigation and installing individual bubblers at plants that require it (i.e. trees). Drip and bubblers shouldn't be mixed in the same zone.
3. Capping a zone—the removal of zone valve and capping of heads in an existing zone. This may be because the area has been converted to hardscape, or plants are mature and do not require regular irrigation.
4. Pressure reducing valve may be one main valve on system or individual zone valves with pressure reduction.
5. Sensors may be a combination sensor (i.e. freeze and rain).
6. Check valve rebate may also be applicable to heads that have a built-in, internal, check valve. Rebate will be applied as applicable.

Terms:

- Rebate is limited to the *cost of the device(s) only* (not installation costs or tax) up to the maximum amounts specified.
- A dated and itemized sales receipt *must be* submitted with the program application within 60-days of installation date to qualify.
- Maximum rebate amount is \$800 per water account for commercial, industrial, multifamily properties. (There is separate application for residential properties—residential maximum is \$400)
- The City does not endorse specific brands or irrigators, nor is not responsible for the performance or repair of the new equipment.
- A *working rain shut-off device must be installed* at the property in order to qualify for any rebate.
- Rebate check will be mailed 2-4 weeks after completed application is processed and approved.
- Rebate is one-time only per calendar year and is available on a first-come, first-served basis thru September 30, 2013 or funds have been expended, whichever comes first. Program is subject to change or end without notice. Please check its status before submitting application.

QUESTIONS OR TO SCHEDULE INSPECTION: Call 512-671-2872 or email jwoods@roundrocktexas.gov

SUBMIT COMPLETED APPLICATION & RECEIPTS TO: fax # 512-218-5563, email jwoods@roundrocktexas.gov or mail Water Conservation, 2008 Enterprise Dr., Round Rock, TX 78664
